

**displayLED** are a leading worldwide full service LED screen sales company. Since 2003 in parallel with promoting the industry established digiLED brand, displayLED provides a range of services including sales, product sourcing, consultancy, installation and maintenance. We operate in all LED screen sectors, supplying leading AV rental companies, fixed installations for the sports, advertising and retail markets and the design of bespoke products for specific applications.

**Display LED Screens Ltd**, The Pixel Depot, Copse Farm, Beare Green, Dorking, RH54LJ, UK

DisplayLED offices: USA | Baltics | Adria | UK | South Africa | China

Key people at displayLED (more details at [www.displayled.com](http://www.displayled.com)):

**Graham Burgess**      **CEO and Founder of displayLED**

A veteran of the giant video screen industry with more than 25 years experience including roles as General Manager - Sony JumboTron, Sales and Marketing Director and European Managing Director of Lighthouse Technologies Ltd.

**Guy Horrigan**      **Commercial Director**

With experience dating back to the dawn of the full colour LED screen business with UK manufacturer Invision, Guy has also worked as European Sales Manager for Lighthouse Technologies Ltd and in the AV rental business for Blitz Communications.

**Paul Hine**      **General Manager**

Over 20 years in LED industry starting out with LED message displays before moving into LED video screens. Prior to displayLED, Paul worked as Head of Logistics and Sales Administration at Lighthouse Technologies Ltd before moving to displayLED in 2006.

**Tom Mudd**      **Head of Technical Department**

Working in the LED industry since 1997, Tom brings a wealth of experience to displayLED. Tom has worked for LED pioneers Invision and Phillips Vidiwall and on a practical level has played key roles on many high profile events and music tours including the 2000 Sydney Olympics and as Head of Video for Robbie Williams. Tom's outstanding engineering skills complements the company's desire to innovate further with the digiLED range and to provide world class engineering support to its clients.

## Business Activities

**China procurement:** Our highly qualified native language speakers and European Engineers based in our Hong Kong office have extensive knowledge of LED manufacturers and production processes. They can help you navigate around potential suppliers in China and the wider Far East. The aim is to locate the right product to suit your application, gain the correct certification and take the stress out of the procurement process for our clients.

- *product identification*
- *product design and modification*
- *CE, FCC, UL / ETL certification*
- *contracting in a legally meaningful way*
- *project management*
- *component inspection and verification*
- *final product sign-off*
- *logistics management*

**Product Development:** We have long track record of developing products to suit specific applications. From ceiling screens to a range of displays for a US music touring specialist; we have the expertise to design, prototype, test, manufacture and project manage the complete process.

**Installation Project Management:** The highly skilled displayLED team is one of the most experienced in the business and provides a complete service from steelwork design, project management, installation and ongoing maintenance. It's what we know, and what we've been doing successfully for years. For full list of installations we have completed, please see projects at [www.displayled.com](http://www.displayled.com).

**Consultancy:** Buying the right screen in a confusing market with huge in quality and price can be daunting. We look at things from your point of view and make sure you get the best advice, the right product for the job and avoid costly mistakes.

**Maintenance:** Many clients require ongoing support. Whether you need one-off service calls, regular maintenance or on-site support for prestigious events, we have a team of experienced technicians available.

**Used screen brokerage:** As the world's largest and most successful used screen broker, [www.displayled.com/used-screens](http://www.displayled.com/used-screens) we're extensively used by rental companies seeking quick solutions for product shortage situations and to realise cash from assets when upgrading to new technology.

**Content Management Systems:** Installing a screen is just the beginning. We can help you choose the right content delivery system that meets your business needs and fits your budget.
